DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, 18-22, 24-31, 34, 36-38, 42, 44, 47 drawn to child entertaining apparatus comprising a wheeled walk-behind walker, classified in class 280, subclass 87.051.
 - II. Claims 15-17, 33, 35, 39-41, 45-46 drawn to a child entertaining comprising a tray, which is coupled to a base by an arm, classified in class 280, subclass 47.371.
 - III. Claims 23 and 51, drawn to a child entertaining apparatus comprising springs to permit bouncing movement, classified in class 280, subclass 47.22.
 - IV. Claims 43 and 48, drawn to an apparatus comprising a rockable base, classified in class 280, subclass 47.1.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are directed to related a child entertaining. The related inventions are distinct if the inventions as claimed do not overlap in scope, i.e., are mutually exclusive; the inventions as claimed are not obvious variants; and the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect. See MPEP § 806.05(j). In the instant case, Claims 1-14, 18-22, 24-31, 36-38, 42, 44, 47 drawn to child entertaining

apparatus comprising a wheeled walk-behind walker, claims 15-17, 33, 35, 39-41, 45-46 drawn to a child entertaining comprising a tray, which is coupled to a base by an arm, claims 23 and 51, drawn to a child entertaining apparatus comprising springs to permit bouncing movement, and claims 43 and 48, drawn to an apparatus comprising a rockable base. The claims above can be distinct and do not overlap in scope.

3. Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. James Flight on 3/14/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the

record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
